FEI HAN

Robot Learning · Dynamics Modeling · Bioinspired Robotics

Email: hanfei@westlake.edu.cn | Website: hanfei-hz.github.io

Westlake University · PhD expected June 2027

Education

Westlake University · PhD, Computer Science and Technology
Aug 2023 - Jun 2027 (expected) · Advisor: Prof. Dixia Fan

University of Chinese Academy of Sciences · MEng · Sep 2019 - Jun 2022
Pattern Recognition and Intelligent Systems
Research at the State Key Laboratory of Robotics, Shenyang Institute of Automation, CAS.

Zhengzhou University · BEng
Measurement and Control Technology and Instruments · Sep 2015 - Jul 2019

Research Appointments

Pennsylvania State University · Visiting Scholar · Apr - Oct 2026

Westlake University · Research Assistant · Jul 2022 - Aug 2023

Research Contributions

Experimental data and hydrodynamic models [2, 9, 11]. Collected and processed force data, developed temporal hydrodynamic models and contributed to a real-fluid learning platform. Related work studies datasets and benchmarks for dynamic load reconstruction.

Safe learning and bioinspired locomotion [1, 3, 10]. Studied constrained policy learning, phase coordination, swimming behavior planning and policy distillation; combined air-water modeling with RL for storm-petrel locomotion. Visiting research examined multilegged swimming through reduced-order models and simulation.

Deep-sea soft manipulation [6-8]. Contributed to NSFC Major Research Plan Integrated Project No. 92048302, studying robots that combine rigid, flexible and soft structures for operations in extreme environments. As a core student contributor to the soft-gripper work, led design, fabrication, sensing and control development, and guided junior students under the advisor's supervision.

Publications and Manuscripts

* Equal contribution. † Co-corresponding author. Applicant name in bold.

Academic Service and Campus Engagement

Westlake visits during IROS 2025. Core organizer and presenter for laboratory-hosted visits; welcomed academic and industry guests and introduced Westlake, the laboratory and its research.

Laboratory open days and science outreach. Hosted visits by primary and secondary school students and explained research platforms, bioinspired robotics and fluid mechanics.

Intelligent fluids conference. Volunteered in conference logistics and on-site service for an event hosted by the School of Engineering.

Undergraduate residential-college exchanges. Shared research experiences and reflections on postgraduate study as a graduate student.

Westlake University choir. Participated in rehearsals and university performances.
